# Kogniz AssureAI

## A SaaS platform that leverages AI for a safer, smarter workplace of the future

Kogniz AssureAI delivers AI-driven insights into health and compliance, identity and access and safety management. Seamless integrations across HR, EHS, access control, time management help HR, EHS and Facilities teams save time and money with better information in real time.

## BENEFITS

▸ **Provide Higher Levels of Health and Safety to Employees/Guests** with touchless employee & guest "check in" process

▸ **Eliminate Manual Reporting of Health and Safety Incidents** by automating health & safety screening and reporting of PPE detection, vaccine validation, temperature screening, occupancy numbers, and other factors for OSHA/DOH compliance reporting

▸ **Increase the Speed of Employee/Guest Check-in Process** using Kogniz AssureAI with Kogniz EntryPoint kiosk that integrates with existing systems using Open API with payroll, HR, reservation, rewards platforms

▸ **Increase Safety** with authentication of employee identity and access control with biometric verification with hand ID or periocular recognition

# KOGNIZ

# Creating safer, smarter spaces for the workplace of the future

*Kogniz uses computer vision to see, interpret, and provide business outcomes, based on videos, pictures, and objects.*

***Kogniz AssureAI*** *uses deep learning models, powered by cameras, objects, and IoT devices to create highly accurate and automated decisions.*

## FEATURES

▸ **Configurable Dashboards** to easily get a holistic view of your locations and where attention is needed

▸ **Pre-entry Survey & Questionnaire** Policy-based workflows and self-service questions for employees with QR code recognition

▸ **Touchless, Fast, & Accurate Screening** Accurate thermal readings in <1 sec via the canthus (inner eye) when standing within 3 feet

▸ **PPE Screening/Detection** Automatically checks for PPE, such as a hairnet, mask, gloves or other 3-D objects

▸ **Unified AI Platform** Monitoring, reporting, and alerting in real time

▸ **Connecting to the Tools You Already Use and Making Them Smarter** Integration with HR, time management systems, EHS, data lakes and other platforms using Open API and generating AI-based insights you can use today

▸ **Biometric Recognition & Access Control** Harness the power of integration across identity with entryway access control
